Aquaflow Pumps Ltd - Limited Warranty Policy

Document ID: AQF-WP-1.0. Version 1.0. Effective date: 1 January 2023. Issued by Aquaflow Pumps Ltd, Unit 9 Riverside Works, Leeds. This policy describes the limited warranty that Aquaflow provides for its X-series pumps. It should be read together with the service manual of the relevant model.

1. Scope and covered products

This policy applies to Aquaflow X-series pumps sold new by Aquaflow Pumps Ltd or its authorised dealers on or after the effective date: the X100 domestic booster pump, the X200 industrial pump and the X300 residential circulation pump, together with genuine Aquaflow control panels supplied with them.

The following are not covered by this policy: accessories and spare parts made by third parties; units bought second-hand from a seller who is not an authorised dealer (unless the warranty was transferred under section 9); and units that have been refurbished or modified by anyone other than Aquaflow or an authorised service agent.

Leased units. Units supplied by Aquaflow under an equipment lease are covered in the same way as purchased units; the warranty runs from the purchase date on the original sales receipt for the unit.

Other models. Only the models named in this section are covered. A model that is not named here (for example a model launched after the effective date) is covered only if Aquaflow publishes an amendment that adds it to this policy.

2. Warranty period

Aquaflow warrants each unit against failure caused by defects in materials or workmanship for twenty-four (24) months from the date of purchase shown on the original sales receipt or invoice.

The warranty therefore ends twenty-four months after the purchase date; for example, a unit bought on 10 May 2023 is covered until 10 May 2025. A claim can be made at any time during the warranty period, provided it is submitted within thirty (30) days of the failure (see section 7).

3. What is covered

3.1 Covered components. During the warranty period the warranty covers failure caused by a defect in any of the following: the motor and motor windings; the pump housing and volute; the impeller; the shaft and bearings (bearings only for their first 8,000 operating hours); the integrated control panel and pressure sensor; and the factory-fitted wiring and terminal box. Mechanical seals are covered against manufacturing defects for the first six (6) months only; after that, seal replacement is normal wear.

3.2 Remedies. For a valid claim Aquaflow will, at its discretion, repair the unit, replace it with a new or factory-reconditioned equivalent, or, if neither repair nor replacement is practicable, refund the purchase price shown on the receipt.

3.3 Costs covered. The warranty covers genuine replacement parts, labour carried out by an Aquaflow-authorised service agent, return shipping within the UK mainland, and an on-site call-out for units weighing more than 25 kg (such as the X200).

3.4 Replaced parts. A part repaired or replaced under this warranty is covered for the remainder of the original warranty period or for ninety (90) days, whichever is longer.

4. Exclusions

The warranty does not cover normal wear of consumable parts as defined in the relevant service manual, damage caused by dry running, improper installation, use of unapproved fluids, or units whose serial number has been removed or altered.

The warranty also does not cover: operation above the rated pressure or temperature stated in the service manual; damage from freezing, flooding, lightning or power surges; failure caused by a lack of the maintenance required by the service manual; cosmetic damage that does not affect operation; and consequential losses such as downtime, lost production or water damage to property.

Approved fluids are clean water and water-glycol mixtures containing no more than 30% glycol. Any other fluid is an unapproved fluid unless Aquaflow has confirmed it in writing.

5. Conditions

5.1 Registration. Owners should register the unit online within thirty (30) days of purchase. An unregistered unit is still covered, but the owner must then prove the purchase date at claim time.

5.2 Installation. X200 units, and any X-series unit used commercially, must be installed by an Aquaflow Certified Installer. X100 and residential X300 units may be installed by any qualified plumber following the installation section of the service manual.

5.3 Maintenance. The owner must carry out the maintenance listed in the service manual. For the X200 a written maintenance log must be kept and made available on request.

6. Proof of purchase

Every claim must be accompanied by the original sales receipt showing the purchase date and the serial number of the unit. Claims without a legible purchase date cannot be assessed.

7. Claims procedure

Claims must be submitted within thirty (30) days of the failure. Aquaflow will repair or replace the failed unit at its discretion.

To make a claim: (1) stop using the unit and isolate it from the power supply; (2) submit the claim through the Aquaflow service portal or by e-mail to the warranty team; (3) include the serial number, a copy of the sales receipt, a description of the failure, photographs, and, for the X200, the maintenance log; (4) keep the unit available for inspection.

Aquaflow acknowledges claims within two (2) business days and completes its assessment within ten (10) business days of receiving all documents. Approved repairs are completed within fifteen (15) business days where parts are in stock.

8. Disputes

If a claim is rejected the owner may request a review within thirty (30) days of the decision. Where the parties still disagree, the unit is assessed by an independent engineer whose fee is paid by Aquaflow if the claim is then accepted.

9. Transfer of warranty

The warranty may be transferred once to a subsequent owner, for the remainder of the warranty period, provided the original sales receipt is handed over and Aquaflow is notified within thirty (30) days of the transfer.

10. Limitation of liability

Aquaflow's total liability under this warranty is limited to the purchase price of the unit. This warranty is in addition to, and does not affect, the owner's statutory rights.

11. Definitions

Date of purchase: the date printed on the original sales receipt or invoice. Failure: a loss of function caused by a defect in materials or workmanship. Normal wear: gradual degradation of consumable parts as defined in the service manual. Authorised service agent: a repairer approved by Aquaflow. Certified installer: an installer holding a current Aquaflow installation certificate.

12. Key time limits

The time limits in this policy - how long the warranty lasts, when to register, how long you have to claim and how long each stage takes - are summarised below.

What	Time limit
Warranty period	24 months from the date of purchase
Mechanical seals (defects)	first 6 months only
Bearings	first 8,000 operating hours
Product registration	within 30 days of purchase
Submitting a claim	within 30 days of the failure
Claim acknowledged	within 2 business days
Assessment completed	within 10 business days of receiving all documents
Approved repair completed	within 15 business days (parts in stock)

Replaced or repaired parts	rest of the warranty or 90 days, whichever is longer
Review of a rejected claim	request within 30 days of the decision
Transfer to a new owner	notify Aquaflow within 30 days of the transfer
